## 1. Getting started with Ghost

For the purposes of this documentation, we assume that you have Ghost up and running. If not, please head on over to <http://docs.ghost.org> and follow through the guide to install and configure your site.

## 2. Installing the theme

Documentation: <http://docs.ghost.org/themes/>

This is what you have to do to install a new Ghost theme:

1. Using FTP, navigate to the directory on your server where Ghost is installed. Once there, navigate to the `/content/themes/` directory.
2. Upload your theme files to this directory.
3. Restart Ghost. How you do this will depend on where you're running Ghost.  
We host our Ghost blog on [DigitalOcean](#), which allows to create droplets in a few clicks.
4. Once Ghost has restarted, log into your Ghost dashboard. Navigate to `/ghost/settings/general/`.
5. In the **Themes** drop-down menu, select the theme you just uploaded.
6. Click **Save**, it's done!

## 3. Changing the theme look

You may edit the CSS files. The files to edit are `/stiky/assets/css/screen.css`

The easiest way to change the colours is to do a find and replace using your text editor (e.g.: [Sublime Text](#)). These are the values you should look for:

<b>#1fbba6</b>	primary color
<b>#9eabb3</b>	secondary color

## 4. Add your social links

To add your social links to your new Ghost theme please follow those simple steps:

1. Open `/stiky/partials/socialnav.hbs`, you will find the following code:

```
<a class="googleplus-button" href="#">Google+</a>
<a class="twitter-button" href="#">Twitter</a>
<a class="facebook-button" href="#">Facebook</a>
```

2. Replace the hashtag (#) with your own social url link, e.g.: <http://twitter.com/MattiaViviani>
3. Done!

## 5. Lateral expandable navigation

To modify the lateral navigation just open `/stiky/partials/lateralnav.hbs` and make your changes.

## 6. PSDs / Photoshop files

All the PSDs included with the theme contains the necessary styles for all elements. If you'd like to modify the elements style open the proper psd, make the necessary adjustments, and then save the file using the command **"Save for Web & Devices"**. All the source files are located in the folder `psd/`. The PSDs included in the package are the followings:

1. `stiky-home.psd`
2. `stiky-post.psd`

## 7. Credits

1. Icons by [iconmonstr](#)
2. Comments plugin by [Disqus](#)

Once again, thank you for purchasing this theme!

**Stiky** is a design by [Mattia Viviani](#).
